PROFILE

Product designer working across digital banking, marketplaces and AI products. I translate requirements into clear user journeys, reusable design systems and implementation-ready interfaces. Experience includes banking across four markets and progression from design intern to UI/UX Manager at Bizinc. Currently studying MSc User Experience Design at the University of Brighton.

EXPERIENCE

UI/UX Designer - Design & Research Lead | Kremor AI

Jun 2024 - Jul 2026 | Contract, part-time | Remote, Lagos, Nigeria

- Led design across a storefront, AI creation workspace and role-based operations platform, using a shared design system.
- Evaluated 96+ AI-model interactions to identify failure patterns and inform trust, confirmation and human-review workflows.
- Designed permissions for five roles and audit-log interfaces to make responsibility for order actions visible.
- Coordinated design assignments, set component standards and reviewed work with the founder and development team.

Product Designer / UI/UX Manager | Bizinc

Apr 2024 - May 2026 | Full-time | Remote, Atlanta, US

- Promoted twice, from UI/UX Intern to Designer and then UI/UX Manager; led junior designers and interns.
- Designed customer and business journeys for marketplace discovery, booking, deals and the operator dashboard on one reusable Figma component library.
- Documented Business Profile 2.0 requirements, reconciling owner and visitor views before interface design and developer handoff.
- Designed dashboard and lead-generation experiences during a period when Bizinc reported 45% higher activation. This was an aggregate company result; individual design changes were not isolated.

UI/UX Designer & Front-End Developer | ITSS - Vista Digital Banking

May 2022 - Apr 2024 | Remote, Geneva, Switzerland

- Designed onboarding, identity verification, transfers and approval journeys for corporate and retail banking across four West African subsidiaries in English and French.
- Clarified multi-entity and multi-currency workflows through entity switching and prominent pending-approval counts.
- Reviewed responsive front-end builds using HTML/CSS; received ITSS's Most Outstanding Intern of the Year recognition for work on Vista.

JAMIU ABDULFATAI

Product Designer | Selected work, skills & education

SELECTED PROJECTS

Radius (formerly Pay4Me) | Cross-border payments

Designed mobile and marketing-site journeys for international student payments, including sponsored payments where the payer and beneficiary are different people.

Chalant AI | AI learning & agent workspace

Designed a workspace for learners to manage five AI agents, with a confidence-based review queue, versioned operating procedures and a required human-review checkpoint.

Arete | Digital healthcare & telemedicine

Designed a seven-step care journey across patient, provider, HMO and pharmacy experiences, considering accessibility, localisation and low-connectivity use.

Shortlet Lagos | Property booking & investment

Designed guest booking and investment journeys for two audiences, including a four-input mobile booking flow and a 23-page brand guideline.

CORE SKILLS

Product design: User flows, information architecture, wireframing, responsive UI, interactive prototyping, UX writing, design systems and developer handoff.

Research: Stakeholder discovery, user interviews, usability testing, journey mapping, competitive reviews and research synthesis.

Complex workflows: Banking and identity verification, role-based permissions, localisation, dashboards, AI trust and human-review patterns.

Tools: Figma (Auto Layout, components, variables and tokens), FigJam, Framer, Miro, Jira, HTML/CSS, basic JavaScript, Git and Google Analytics.

EDUCATION

MSc User Experience Design | University of Brighton, UK

Sep 2026 - 2028 (expected)

BSc (Hons) Physics | Federal University Dutsin-Ma, Nigeria

Aug 2018 - Jan 2023

CERTIFICATIONS & RECOGNITION

User Interface & UX Design - Great Learning

Front-End Development (HTML/CSS) - Great Learning

Building AI Apps & Voice Automation Workflows - Udemy

Finalist - Synergy Africa Design Quest, 2023
