Logo Variants/Usage

To maintain visual consistency and versatility across various applications, the Shortlet Lagos brand offers two primary logo variants:

Icon-Only Logo

This version features just the logo symbol. It's ideal for minimal applications like favicons, social media avatars, watermarks, or use where space is limited and brand recognition is already established.

Full Logo (Icon + Wordmark)

This version combines the icon with the "Shortlet Lagos" text. It is the primary and most recognizable version, perfect for websites, documents, signage, and most branding materials where clear brand identity is essential.

Use each variant intentionally, based on space, clarity, and visual context to ensure consistent brand impact across all touchpoints.

Usage on Backgrounds

The full-color logos should be used only on white, black or Midnight Green backgrounds.

Avoid using full-color logos on photographs unless the logo sits on a black or white area of the image.

Construction, Clearspace & Computation

It is important to keep corporate marks clear of any other graphic elements. To regulate this, an exclusion zone has been established around the corporate mark.

This exclusion zone indicates the closest any other graphic element or message can be positioned in relation to the mark of the the symbol itself and our company name – they have a fixed relationship that should never be changed in any way.

Logo Misuse

To maintain the integrity of our brand, the Shortlet logo must always appear clear, consistent, and unobstructed.

Improper use of the logo can dilute our identity and confuse our audience. Please follow these guidelines to ensure the logo is always used correctly:

- Do not alter, rotate, stretch, or distort the logo in any way.
- Do not change the colors of the logo or apply gradients, shadows, or filters.
- Do not place the logo on busy or low-contrast backgrounds that reduce legibility.
- Do not separate or rearrange the elements of the logo — the icon and text have a fixed relationship.
- Do not crowd the logo with text or other visual elements. Always maintain the minimum exclusion zone around it.

Respecting these rules helps reinforce our brand's exclusivity, luxury, and security across every touchpoint.
