Summary

UX/UI designer with four years' experience across the whole research and design process, from discovery interviews and surveys to high-fidelity UI, design systems and developer handoff. Work spans banking, payments, marketplaces, SaaS and generative AI, for teams in the US, Europe and Africa. Starts each new domain with research, then turns messy requirements into clear journeys that can be tested and built. Studying for an MSc in User Experience Design at the University of Brighton.

Skills

User Interviews · Surveys · Usability Testing · Diary Studies · Competitive Analysis · Research Synthesis · Journey Mapping · Information Architecture · Interaction Design · Wireframing · Prototyping · Visual UI Design · Design Systems · Accessibility (WCAG) · Localisation · Developer Handoff · Figma · Framer · HTML/CSS · AI-assisted Prototyping

Work Experience

Design & Research Lead · Kremor AI · Remote (part-time contract) 06/2024 – 07/2026

- Led research and design for three connected products, a customer storefront, a generative design workspace and a workshop operations platform, all built on one shared design system.
- Replaced a blank AI prompt with guided quick actions and conversation starters, so customers without design vocabulary could describe garments and name textiles such as Ankara, Aso-Oke and Adire.
- Designed operations for five staff roles, with a permissions matrix, confirmation steps for high-risk actions and audit logging.
- Evaluated complex AI tasks across language and image models, logging failures in text rendering, lighting and anatomy to inform product decisions.

UI/UX Manager · Bizinc · Atlanta, USA (Remote) 04/2024 – 05/2026

- Promoted from UI/UX Intern to Product Designer to UI/UX Manager on a live two-sided marketplace (bizinc.io) covering booking, e-commerce and social features, leading the junior design team.
- Mapped customer and business-owner journeys separately, then brought them together in Business Profile 2.0 with distinct business and client views.
- Designed discovery cards showing service, location, distance and open-now status, and an AI-assisted booking flow that links chat requests to real availability.
- The redesign period saw company-reported gains of +45% dashboard activation, +38% retention and +23% customer growth.

UI/UX Designer & Front-End Developer · ITSS (Vista Bank Group) · Remote 05/2022 – 04/2024

- Designed retail and corporate mobile banking journeys for four West African subsidiaries, in English and French.
- Built one localisable design system that handled local currencies, languages and regulatory copy across all four markets.
- Kept company context and approvals visible for finance managers acting on behalf of several legal entities.
- Worked with product and engineering from requirements to HTML/CSS build; named ITSS Most Outstanding Intern of the Year (2023).

Selected Projects

Settle · UX Research · MSc, self-initiated 09/2026 – Present

- Mixed-methods study of international students' first 30 days in the UK: survey, follow-up interviews, a diary study and a review of GOV.UK, UKCISA and university guidance.
- Synthesised the findings into a task dependency map, a journey map with pain ratings and three testable hypotheses for a service concept.

Radius (formerly Pay4Me) · Product Designer 2025

- Designed sponsor-first payment journeys on iOS, Android and web for international students and the families paying their tuition, visa and SEVIS fees.
- Built trust with people-first recipient details, visible verification and a QR handoff from desktop to mobile, for a product with a company-reported 120K+ registered users, 96+ payment corridors and 1,500+ five-star reviews.

Horal · End-to-End Product Designer 2025

- Designed buyer and seller journeys for a multi-vendor marketplace, with seller verification, multi-state escrow checkout, chat inside the purchase flow and one seller workspace for stock, orders and payouts.

More case studies, including Chalant AI, Arete, Shortlet Lagos and Synqit, at jamiudesigns.vercel.app

Education

University of Brighton | MSc User Experience Design 2026 – Present
Brighton, UK

Federal University Dutsin-Ma | BSc Physics
Katsina State, Nigeria

Notion Computer Institute | Diploma, Computer Utilisation and Desktop Publishing
Nigeria
